DETAILED ACTION

- This office action is in response to the amendment filed on 11/8/2007.
 Applicants have amended claims 1-7. Claims 1-22 are currently pending in the application.
- 2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claim Rejections - 35 USC § 103

3. Claims 1-3, 11-12, 16-17 and 21-22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kawanishi et al (US 4, 265, 993) in view of Magome et al (US 2001/0028988 A1).

The rejection is adequately set forth in paragraph 4 of office action mailed 5/9/2007 and is incorporated here by reference.

4. Claims 4-7, 9-10, 14-15 and 19-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kawanishi et al (US 4, 265, 993) in view of Magome et al (US 2001/0028988 A1) as applied to claims 1-3 above, and further in view of Ozaki et al (JP 05295123 A).

The rejection is adequately set forth in paragraph 5 of office action mailed 5/9/2007 and is incorporated here by reference.

5. Claims 8, 13 and 18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kawanishi et al (US 4, 265, 993) in view of Magome et al (US 2001/0028988 A1) as applied to claims 1-3 above, and further in view of Matsunari et al (US 5, 319, 337).

The rejection is adequately set forth in paragraph 6 of office action mailed 5/9/2007 and is incorporated here by reference.

Response to Arguments

- 6. Applicant's arguments, see page 7, lines 10-14, filed 11/8/2007, with respect to objection have been fully considered and are persuasive. The objection of claims 1-22 has been withdrawn.
- 7. Applicant's arguments filed 11/8/2007 have been fully considered but they are not persuasive. Specifically applicant's argue that (A) molecular weight, glass transition temperature and conditions for particle formation of present claims provide superior properties; (B) Magome et al disclose a polymerizable monomer and not a resin; and (C) specific conditions of spray drying as recited in present claim 7 is not disclosed by Ozaki et al.

With respect to (A), Kawanishi et al disclose a molecular weight of 38,000, T_g of 70^o C while Ozaki et al teach a simple process for obtaining a composite particle. The discussion with respect to these features in paragraphs 4 and 5 of office action mailed 5/9/2007 is incorporated here by reference. The superior properties naturally flow from the combined teachings of Kawanishi et al, Magome et al and Ozaki et al.

With respect to (B), Magome et al discloses a magnetic toner comprising magnetic toner particles containing at least one binder resin (abstract). The paragraph 0020 cited by examiner in fact teaches that the polymerizable monomer is formed into a binder resin.

With respect to (C), specific conditions of spray drying i.e. inlet and outlet temperature of 100°C to 300°C and 40°C to 200°C respectively, of present claims overlaps with the inlet temperature of 80°C to 120°C and outlet temperature of 45°C to 80°C taught by Ozaki et al.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire

THREE MONTHS from the mailing date of this action. In the event a first reply is

filed within TWO MONTHS of the mailing date of this final action and the advisory

Application/Control Number:

10/572,646 Art Unit: 1796

action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Contact Information

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Karuna P. Reddy whose telephone number is (571) 272-6566.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Vasu Jagannathan can be reached on (571) 272-1119. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR
